Paper Protoype 2

For the second paper prototype I focused on including all of the features that I missed in the first one. Things like price, number of seats, sign up/sign in page, etc were all included in this version. I was still able to get some good feedback again about things like separating the driver and rider page into "post" and "search" pages, providing optional and required fields for more speceficity, and allowing drivers to set mandatory pickup locations.
